

# Moderniek Bagliner

## Specifications

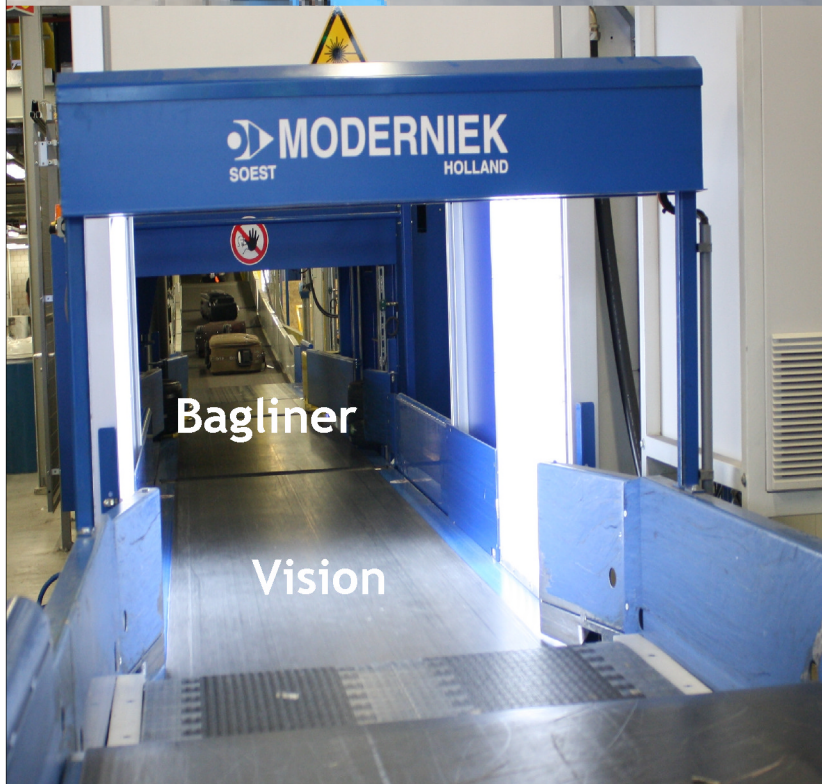

- Orientating luggage short side leading
- Orientating luggage in the middle of the conveyor
- Belt speed up to 1 m/sec
- Capacity ca. 1200 bags/hour
- Adjustable speed
- For the control of the Bagliner is information about the bag required.

## Bagliner dimensions

- Length = ca. 3200 mm
- Width = ca. 2400 mm

## Vision dimensions

- Length = ca. 3200 mm
- Width = ca. 3000 mm

## Concept:

1. Vision system generates information about the position, angle and dimension of the bag.
2. During transport the Bagliner moves a rotatable wheel across the beltconveyor.
3. The stroke, rotating speed and the choice of which wheel will be used depends of the baginformation.
4. The bag rotates around the wheel until it is in the middle and orientated short side leading. (allowable variation ca. 10 degrees).
